About Chap Robotics

Chap Robotics participates in competitions that are anything but boring, with most at the international level. In fact, participants have called them life-changing and the “hardest fun ever.”

These aren’t kit robots, but original designs that meet a specific challenge that changes annually. Competitions aren’t anything like the average science fairs, but a true sport that engages youth in STEM like never before. Plus, while participants learn the engineering process and gain key technical skills, there’s also a healthy dose of soft skill acquisition that many say are sorely lacking in new graduates (collaboration, listening, presentation and public speaking, time and project management, budgeting, and more).

Our programs have a history of continued growth and consistently win awards at the competitions in which they are involved. Many of our

participants credit their experience in Chap Robotics in helping them target their career goals...and these are most frequently in STEM disciplines.

Programs currently participate in *FIRST* Robotics® at the high-school and elementary levels. Our middle school programs have participated in BEST Robotics™. These programs have resulted in the expansion of technical education, including robotics classes in high school and middle school, and CAD and digital electronics in high school.

Sponsors are the life-blood of our organization. Without sponsors we couldn’t provide these opportunities. All sponsor donations go to WESTA, the 501(3)(c) nonprofit organization that provides Chap Robotics’ programs with funding and support.

FIRST® Team 2468, “Team Appreciate,” is based at Westlake High School (Eanes ISD; Austin, TX). The team includes primarily junior and senior students, many of whom are alumni of our FTC teams. It also includes sophomores with previous experience in robotics who prove themselves capable of the level of performance required. Team 2468 has been competing in FRC since 2008, when it won multiple awards, including the Rookie All-Star award at the FRC Lone Star Regional (Houston, TX), earning a spot at *FIRST* World Championships. Since then, Team 2468 has become well-known in the *FIRST* community for its excellence, returning to the championship competition again and again. The 2012-13 season brought additional accolades, including Winning Alliance Captain at the 2013 FRC Alamo Regional (San Antonio, TX) and FRC regional-level’s highest and most coveted award, the Regional Chairman’s Award, which the team received at the 2013 FRC Hub City Regional (Lubbock, TX).

Our FTC program includes four teams comprised of freshman and sophomore students at Westlake High School. These are *FIRST* Teams 3781, “The Pi-Rho Maniacs;” 5628, “The Tau Manifesto;” 6504, “Toque Omega;” and 6710, “Summation.” FTC teams build smaller, but no less complex, robots. Each team has been successful in competition, with 3781 receiving the FTC regional-level highest, the Regional Inspire Award, at the 2013 FTC Alamo Regional (San Antonio, TX). Both 3781 and 5628 qualified to compete at the 2013 FTC World Championships and the program was chosen to represent Central Texas at the 2013 FTC Asia-Pacific Invitational (Sydney, Australia).

Beginning in 2011-12, FRC students helped launch and mentor robotics teams at both Eanes ISD middle schools. Competing in BEST Robotics, both teams were highly successful, with first HCMS and then WRMS winning the local competition, as well as both earning the BEST Award in alternate years. There are now robotics classes, as well as the extracurricular robotics teams, at both schools.

We’re just getting started with FLL programs in Eanes ISD elementary schools. Both our FRC and FTC programs include FLL alumni who credit involvement in robotics at an early age with inspiring them to continue their involvement and interest in robotics and STEM in general. Participants regularly visit elementary schools, participate in Science Day activities, and look for opportunities to start and mentor new teams.

Sponsorship Levels

Many of our sponsors have been with us since our rookie season. The addition of WESTA support, providing for tax-deductible donations, has made it even more beneficial to be a sponsor. Your donation is active for one year from its receipt, but we hope you'll continue to support our efforts for years to come.

CROWN

\$10,000

Only two available

- 2+ national media placements
- 3+ local media placements
- Preeminent name/logo placement
- Crown Sponsor window decal
- Crown Sponsor recognition item

GOLD

\$5,000

Only four available

- 1+ national media placement
- 2+ local media placements
- Prominent name/logo placement
- Gold Sponsor window decal
- Gold Sponsor recognition item

SILVER

\$2,500

Unlimited available

- 1+ local media placement
- Name/logo placement
- Silver Sponsor window decal
- Silver Sponsor recognition item

BRONZE

\$1,000

Unlimited available

- Logo (\$1,000+) or name (<\$1,000) placement
- Bronze Sponsor window decal
- Bronze Sponsor recognition item

Extended Benefits

Becoming a WESTA sponsor is not only rewarding to your organization, but offers myriad reward opportunities for your employees. It's a change to make a BIG difference in not only the lives of our program participants, but it helping to

- Engage in a different publicity and branding opportunity
- Strengthen your community reputation
- Build a technologically literate workforce
- Create a pipeline of interns and future employees
- Provide rewarding employee volunteer opportunities
- Inspire company engineers and other employees
- Recapture American technology leadership!

In-Kind Donations

While financial support is always appreciated, some organizations may consider, either as an addition or an alternative, making in-kind donations of supplies, equipment, or services that will be of benefit either to the Chap Robotics programs or to WESTA.

Needs can change quickly and we ask that you contact us before delivery of any in-kind donation so that we can confirm its usability, whether it meets Eanes ISD's safety and suitability requirements, and, if needed, work with you on how to get it to us. We also ask that you provide, in writing, an estimate of the value of your in-kind donation so that WESTA may issue an appropriate receipt.

Turn the page for suggestions →

Ideas for In-Kind Donations

- Host a team meal on a shop night or Saturday
 - Printing and copying services
 - Space for practice fields
 - A large trophy case (we have nowhere to put our many awards!)
 - WordPress website design services and/or mentorship
 - Mentors to work side-by-side with our student participants (both technical and non-technical)
 - Volunteers to help staff events
 - Help organize and host a fundraising event
 - Fund a scholarship
 - Leads to other potential sponsors
 - Strategic planning services
- Sponsor an event or activity
 - Outreach to help inspire girls to engage in STEM (and maybe join our teams!)
 - A fun event to reward participants for their hard work (e.g., movie night, game night, laser tag night, etc.)
 - Bookkeeping services
 - Meeting or office space
 - PR and advertising consultation
 - Fundraising consultation
 - Supplement team travel costs to competitions (particularly for our mentors who donate huge amounts of their time)

About WESTA

Founded in 2010, the Westlake & Eanes Science & Technology Association (d/b/a WESTA) is an educational and scientific 501(c)(3) nonprofit organization. WESTA focuses on the support and promotion of competition robotics programs, primarily within the boundaries of the Eanes Independent School District (EISD), located in Austin, Texas.

Chap Robotics is WESTA's flagship program. Mentors involved in Chap Robotics from its start in 2007 quickly realized that EISD, like many school districts, is affected by the drop in school funding that is so widespread. Chap Robotics receives funding from EISD, but it is minimal and must also cover Westlake HS's three-year robotics curriculum. Each year, WESTA must raise close to \$50,000 to provide consumable supplies and competition entry fees for the seven robotics teams it sponsors. WESTA also works to ensure appropriate screening of mentors who work directly with students, manages team travel to competitions (including local, regional, national, and international).

WESTA is a virtual organization with a board of directors that includes parents of current and past-participants, mentor representatives, and local business luminaries. We are 100% volunteer run and work hard to keep our operating costs to a minimum. 96%-98% of the funds we raise go directly to benefit our programs. We are really all about our student participants.

You can learn more about WESTA and the success of our programs at westaaustin.org.
